Method: HPLC-DAD. LOQ = Limit of Quantitation. Unless otherwise stated all quality control samples performed within specifications established by the Laboratory. *When reporting totals, acidic cannabinoids are multiplied by 0.877 to account for loss of mass from decarboxylation upon heating; therefore, this is the POTENTIAL amount upon complete decarboxylation from smoking/ vaping.

MICROBIALS

| Microbial Parameters | Permissible Limit | loq/ lod | Results | Status |
|------------------------|----------------------|----------|---------|--------|
| | CFU/g | CFU/g | CFU/g | |
| Total Aerobic Bacteria | 1000 | 10 | ND | PASS |
| Total Yeast/ Mold | 100 | 10 | ND | PASS |
| E. coli | Absent in 1ml | 1 | ND | PASS |
| | | | | |

Method: Petrifilm Plate method for enumerations; Quantitative PCR for presence/ absence assays. Criteria: Eur. Ph. 5.1.4. Oral Use Limits. Absence of E. coli in 1g or 1 ml.

LOQ = Limit of Quantitation; CFU = Colony Forming Units. The reported result is based on a sample weight with the applicable moisture content for that sample; Unless otherwise stated all quality control samples performed within specifications established by the Laboratory.

Method: GC-FID. Criteria: ICH guideline Q3C (R6) on impurities: guideline for residual solvents; Table 3, Class 3 Residual Solvents. LOQ = Limit of Quantitation; The reported result is based on a sample weight with the applicable moisture content for that sample; Unless otherwise stated all quality control samples performed within specifications established by the Laboratory. ND = Not Dete
